HUMANITY IN TRANSITION :An Academic Symposium

BUSINESS PRODUCT PITCH SEGMENT

From Idea to Enterprise

FINAL PRESENTATION GUIDELINES

The six shortlisted schools will present refined business ventures, building on their first-round proposals through further research, testing and financial planning. A slide presentation is compulsory; displaying a functional product or working service prototype is optional.

Final presentation: Thursday, 5 November 2026. **Time limit:** 10 minutes, including any demonstration, followed by cross-questioning by the judges.
Submission format: PPTX or PDF.

1. General Guidelines

- Each school must participate with its registered **four-member team from Classes 11 and 12**. Schools may decide which members speak.
- Teams must retain their original business idea and selected theme—**Circular Economy or Gig Economy**—and demonstrate improvements since Round One.
- Photographs, videos and other supporting material may accompany the main presentation to explain the product or service and how it works.
- Participating schools must bring a **pendrive** containing their presentation and submit it on the **morning of the symposium. Please label with SCHOOL NAME.** The pendrive must be in working order.Host school will provide a laptop. It is advisable to carry the presentation on a second back up pendrive.

- Acknowledge all research sources and external assistance. Clearly distinguish estimates and planned features from tested results and completed work.

2. Essential Presentation Content

Teams may combine related sections, provided all requirements are covered within the **10-minute limit**.

1. **Venture Overview:** Venture name, team members and selected theme.
2. **Problem, Customers and Research:** Problem statement, target customers and research findings.

3. **Solution and Development:** Proposed solution, key features and improvements since Round One.
4. **Product Function and Validation:** How it works, testing results and limitations; live demonstration, if included.
5. **Market and Business Model:** Competitors, competitive advantage, pricing and revenue streams.
6. **Operations and Marketing:** Production or service delivery, key resources and customer acquisition.
7. **Financial Viability:** Start-up costs, cost per unit or transaction, sales forecast and break-even.
8. **Responsible Impact and Risks:** Theme integration, social and environmental impact, key risks and mitigation.
9. **Implementation and Conclusion:** Next steps, growth plan, team contributions and support required.

References and Appendix: Include research sources, supporting calculations and test evidence for reference during cross-questioning.

3. Judging Criteria

- **Research:** Quality and credibility of primary and secondary research.
- **Innovation:** Originality and effectiveness of the solution.
- **Target Market:** Understanding of customer needs.
- **Competitive Advantage:** Clear USP and competitor analysis.
- **Business Model:** Practical operations and revenue generation.
- **Financial Potential:** Viability and scalability.
- **Prototype and Proof of Concept:** Evidence of quality and functionality, presented through supporting material or an optional live demonstration.
- **Responsible Impact:** Sustainability, corporate social responsibility and social benefits.
- **Risk Management:** Identification and mitigation of key risks.
- **Teamwork and Presentation:** Coordination, clarity and delivery.
- **Cross-Questioning:** Informed, clear and well-reasoned responses.

4. Expected Learning Outcomes

This academic event encourages innovation, creativity, enterprise and responsible problem-solving beyond competition. Students will learn to think like founders, reason like analysts, collaborate as teams and present like professionals.
